

Metro.OTDR-F7

PR - 25 words

Metro.OTDR-F7 is a high performance OTDR for installing and troubleshoot optical infrastructures and FTTx network.

PR - 50 words

Metro.OTDR-F7 is a high performance OTDR for installing and troubleshoot optical infrastructures and FTTx network. It can measure physical characteristics such as length, transmission loss and splice loss. It can also locate the faults or breaks of optical fiber. Excellent in the deployment and maintenance of optical system

PR - 100 words

Metro.OTDR-F7 is a high-end solution widely used in engineering construction, maintenance test, optical fibre troubleshooting, manufacturing and installation of optical fibre and cables. Multiple interfaces and accessories are provided including VFL, OPM, four simultaneous Wavelengths, remote control, and direct printing of trace or events table. Fast analysis is also possible to determine and locate the faults precisely and listing all events not requiring high profile experts.
